Mirko Walenten

Data Science Student · Data & BI Analyst

PROFESSIONAL PROFILE

Data Science student at the University of Buenos Aires (UBA, 3rd year) with experience at a software company, where I turn financial and operational data into reports, dashboards and insights for management. I built the company's internal management system, automate processes with generative AI, and support a team of about 10 developers in using Claude. I work with Python, SQL, Power BI and advanced Excel.

WORK EXPERIENCE

Data & BI Analyst
Aug 2026 – Present

PAC Software S.A. · Buenos Aires, Argentina

- I turn financial and internal management data (income, expenses, hours) into insights and weekly reports for management and the Development and Consulting teams.
- I automate recurring reporting with AI tools, optimizing key reporting and control processes.
- I designed and built the internal management system: a centralized platform for services, finances and development-team hours, used by management.
- I set up the Claude Business (generative AI) environment for about 10 developers and advise them on queries and projects.

Administration Manager
Jan 2026 – Aug 2026

PAC Software S.A. · Buenos Aires, Argentina

- Tracking and reporting of income and expenses for Argentina and Chile, with administrative and financial control.
- Produced weekly reports for Development and Consulting using accounting models in advanced Excel.

EDUCATION

BSc in Data Science (Licenciatura)
2024 – 2028 (3rd year)

Universidad de Buenos Aires (UBA)

Technical Diploma in Information Technology
2018 – 2023

Escuela Técnica ORT Argentina

PROJECTS

Mozak · Finance & Productivity

- Created and launched Mozak, a personal organization app that integrates finances, projects, studies and health, available for free at mozak.pro.
- Owned the product end to end: UX/UI design, development and production deployment.

CC Medios Platform · Client project

- Web platform for CC Medios (outdoor advertising) that unifies clients, billboards, orders, collections, payments and invoicing, with per-operation margin and due-date alerts.
- Mapped processes with the client, designed the data model, interface and role-based permissions, and built and deployed with React, TypeScript, Supabase and Vercel, with AI assistance (Claude Code), in phased deliveries with demos.
- Automatic reading of ARCA PDF invoices, automatically linked to their sales order.

Data Challenge 2026 AlixPartners × ECI (Bonsai Corp case)

- Packaging optimization model: reduced the catalog from 204 to 48 box types (−76%), with projected savings of USD 21.1M per year (+10.1%), validated on the official Kaggle platform.
- Web report with data visualizations and a protocol for new products: bonsai-corp-informe.vercel.app
